Executive profile

Executive consultant and serial entrepreneur with 17 years across enterprise B2B sales, software-business turnaround, M&A, deep-tech innovation and executive advisory. I work where decisions are hardest: negotiation deadlocks, power and information asymmetries, market repositioning and structural transitions. Trusted as the direct, extra-hierarchical strategic arm of two CEOs and as strategic advisor to a leading Brazilian materials scientist for 3+ years. I combine commercial execution (hunter and farmer), strategic modeling and applied AI to turn complex choices into aligned, executable decisions — across Brazil, the United States, Latin America and Europe.

Trusted as the "left arm" of CEOs and scientists

CEO of Domus (Brazil) · JV with Lepton (Argentina)

Extra-hierarchical strategic arm of the CEO in a high-pressure turnaround. Enterprise-wide diagnosis; led the strategic repositioning toward M&A and took part directly in the negotiations that ended in the acquisition by Promob.

Jill Diamond · CEO, New York

Hybrid executive role (2020–2022) supporting leadership decisions between Brazil and the United States: international business planning, brand strategy, partnership evaluation and delivery of a new digital platform. Later described by her as "unafraid".

Prof. Dr. Daltro Garcia Pinatti (1940–2021) · USP

Strategic advisor for 3+ years to the founder of Brazil's Niobium Project, the first Honorary Professor of USP and holder of dozens of patents. Influenced governance, strategic direction and project pivots through independent, evidence-based analysis.

Core capabilities

Strategy & CEO advisory

- Executive strategy and decision structuring
- Strategic repositioning and scale-up strategy
- Governance, succession and organizational realignment
- Risk and decision-making under uncertainty

Commercial & negotiation

- Complex B2B sales (hunter & farmer)
- International and strategic negotiation
- Signal-based strategic prospecting
- Pricing, proposal architecture and closing

Innovation, tech & M&A

- M&A readiness, valuation and negotiation
- R&D&I and deep-tech commercialization
- University–industry–investor ecosystems
- AI-assisted analysis; Python; BI and product strategy

Professional experience

Founder & Strategic Architect
May 2020 – Present

Jannuzzelli — Strategic & Cognitive Architecture · Brazil · Remote

- Lead an independent practice for executives, founders and leadership teams in high-complexity B2B settings, engaged at strategic inflection points: high-stakes negotiations, repositioning, organizational realignment and M&A structuring.
- Design decision frameworks and negotiation architectures that let leadership teams structure complex choices, align stakeholders and execute under uncertainty.
- Built the commercial engine end to end: signal-based account selection from public evidence, one-to-one multi-channel outreach, discovery conversations, pricing, proposal terms and IP protection.
- Negotiated a technical-partner pilot and declined a lead-referral structure that would have reduced the practice to an intermediary — protecting value capture and independence.
- Developed proprietary methodology and AI-assisted analytical workflows; bilingual go-to-market (PT/EN).

Strategic Marketing Advisor (hybrid executive role)
Feb 2020 – Dec 2022

by Jill Diamond — New York, USA · New York · Brazil

- Worked directly with the CEO across Brazil and the United States: business planning, strategic repositioning, growth strategy and partnership evaluation.
- Led strategic coordination and delivery of the new digital platform, integrating marketing, communication and business strategy for scalability and long-term value.
- With his help, a series of digital programs was rolled out over 18 months (per the client's recommendation).
- Took part in U.S.-based corporate training programs on innovation, marketing and business development; operated across strategy and execution in cross-border conditions.

Founder & CEO — Strategic Innovation, R&D&I, Corporate Bridging
Aug 2013 – Dec 2019

Drarian · Greater São Paulo

- Created a structured executive bridge between academia, corporations and investors, after leading a deep-tech initiative with INOVA UNICAMP on applied nanotechnology in wood.
- Orchestrated innovation ecosystems with USP, UNICAMP, UNIFESP and UNESP, technology institutes and multinationals; built partnerships with Duke Energy, Caos Focado (an MIT partner) and internationally awarded startups.
- Translated research into market-ready pipelines and M&A-oriented ventures; led long-cycle programs involving multiple patents.
- Strategic advisor to Prof. Dr. Daltro Garcia Pinatti (USP) for 3+ years, directly influencing governance, strategic direction and project pivots.
- Structured a multi-institutional assistive-technology platform linking engineering, design, healthcare and public systems, with Hospital Lucy Montoro as validation environment.

Executive Strategic Consultant · CEO Advisory · M&A & Corporate Turnaround
Feb 2013 – Aug 2013

Domus & Lepton (Brazil–Argentina software JV) · Campinas, SP

- Engaged by the CEO as a direct, extra-hierarchical strategic arm; led an enterprise-wide diagnosis of governance, product, technology, marketing, sales, UX, training, customer success and organizational health.
- Found the critical gap between backend complexity and an adoption-blocking UX, systemic failures in onboarding and post-sales support, and revenue-integrity and compliance risks.
- Assessed public funding (FINEP, FAPESP), confirmed the operation's structural financial exhaustion and led the repositioning toward M&A — participating directly in the negotiations that culminated in the acquisition by Promob.
- Opened a R&D&I pathway with Softex, CPQD, Instituto Eldorado and INOVA UNICAMP; recognized by INOVA UNICAMP as a visionary entrepreneur.

B2B Sales Executive (Hunter & Farmer)
Nov 2009 – Apr 2011

TIM Brasil · São José dos Campos, SP

- Full-cycle enterprise sales of high-impact technology-infrastructure projects to multinationals; recognized as the best salesperson at TIM and at Embratel for negotiation quality and high-added-value sales.

What colleagues and clients say

"Tulio holds a quality that every passionate professional needs: Tulio is unafraid. This is important in every role we play in life since we only become experts through trial and error and a willingness to face the fear and do "it" anyway. During the Pandemic, Tulio came to work with me as marketing and design support. He made it clear that his technology expertise was more about User Experience than in the actual marketing and designing of websites and online courses, but it did not stop him from giving himself fully to my projects. With his help, I was able to roll out a series of digital programs over an 18-month period. Tulio is also unafraid to speak up when he has opinions. The great news is that he knows how to deliver the message with grace, which makes seeking his advice easy to do. I highly recommend Tulio for his creativity, diligence, and honesty."

Jill Diamond · CEO, New York — client (2025) · LinkedIn (original: EN)

"Túlio's extensive experience in business intelligence and project management, combined with a proactive approach to leading and managing technical project teams, enabled our team to meet strict deadlines and thrive under pressure."

Tim Gardner · National IT Manager — reported to Túlio (2019) · LinkedIn (original: EN)

"Túlio was my martial arts instructor, project partner, project leader and personal and professional development coach. His motivation, engagement and interdisciplinarity span social, psychological and technological aspects."

Paulo Renato Montagner · Researcher, DEMAR/EEL-USP project (2019) · LinkedIn (translated: PT)

"Always determined, with the grit to overcome challenges. Skilled at leading negotiations and projects and at finding alternative solutions to work around problems and objections."

Jonatha Brassolatti · Managed Túlio directly (2013) · LinkedIn (translated: PT)

"Túlio shows desire to learn into Domus & Lepton. I believe he will be a winner and will contribute to a professional relationship increasingly synergistic and profitable."

Gabriel Emidio · Domus & Lepton team (2013) · LinkedIn (original: EN)
